KALI KEY
BOLT ACTION AR

HOW IT WORKS

The Kali Key Bolt Action System converts any mil-spec, direct impingement AR into a bolt-action firearm. It works by diverting cycling gases away from the firearm via the ejection port, making it impossible for the AR to cycle semi-automatically. The Kali Key installs with the same ease of installing a BCG and requires no other modifications to the firearm or its gas system. The Kali Key benefits those living in "assault weapon" jurisdictions because "assault weapon" laws typically specify that bolt-action firearms are EXCLUDED from the definition of an "aw," regardless of the firearm's features and even when the firearm is banned by name.

ILLINOIS

1. The PICA law lists semi-automatic firearm features that constitute an "assault weapon." It also lists "AR types" that are banned. **Critically, that same section contains an explicit exclusion** to said "aw" features and list. It states: "(I) 'Assault weapon' means any of the following, **EXCEPT AS PROVIDED IN SUBDIVISION (2) OF THIS SUBSECTION:**"

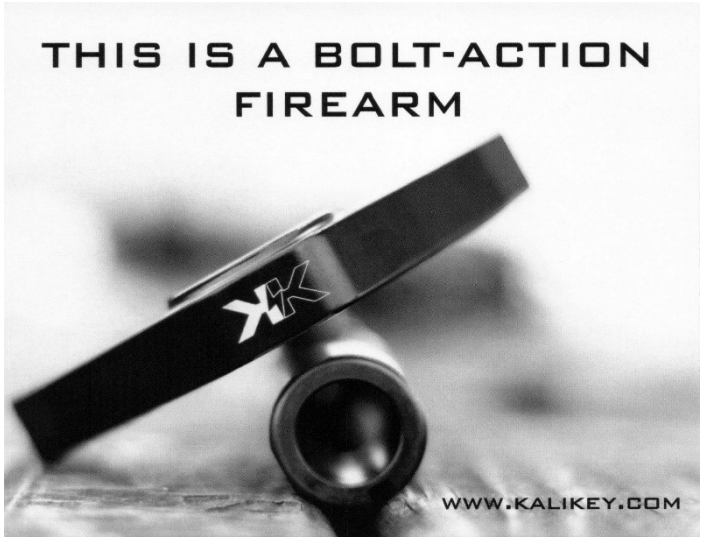
2. **Subdivision (2) states: "(2) 'ASSAULT WEAPON' DOES NOT INCLUDE: (C) A FIREARM THAT IS MANUALLY OPERATED BY BOLT"** ...

3. **This means that if an AR operates as a bolt-action, it falls outside the definition of an "assault weapon," EVEN IF IT POSSESSES BANNED FEATURES OR IS ON THE PROHIBITED LIST.**

READ THE ANALYSIS BY THE LEAD ILLINOIS ATTORNEY ON HARREL V. RAOUL TO SEE HOW THE KALI KEY COULD HELP YOU:

- Convert your AR to remove it from the "aw" category.
- Reinstate private-party transfers.
- Remove the requirement for "aw" registration.
- Retain otherwise banned "aw" firearm features.

BOLT-ACTION INFO CARD



ABOUT KALI KEY

Since its inception, Kali Key has used sales to support grassroots Second Amendment organizations. These organizations bring lawsuits to claw back our Civil Rights and promote legislative freedoms. For example, Kali Key's support of San Diego County Gun Owners has seen court victories against California's assault weapon ban (Miller v. Bonta) and other pivotal cases. We are proud of our small part in these victories, and we hope to help achieve the same in other restrictive jurisdictions nationwide. Our corporate mission is to win back our rights and eventually make the Kali Key obsolete.
